

Please let Sinclair Broadcasting know that their license will be endangered if they force their stations to air an anti-Kerry documentary days before the election. Our valued "Fourth Estate" is losing its ability to serve as a check on government and business, and as a provider of the information required for democratic education and decision making.

We cannot allow large media companies to use the public airways to determine what our citizens hear. Please monitor carefully those who hold licenses and make them compete with other applicants for best service to the public, best contribution to an educated populace, fairest coverage, etc. if they expect renewal.
